the genesis of roman architecture book by hopkins j north

June 1st, 2020 - An important new look at Rome's earliest buildings and their context within the broader tradition of Mediterranean culture this groundbreaking study traces the development of Roman architecture and its sculpture from the earliest days to the middle of the 5th century BCE. Existing narratives cast the Greeks as the progenitors of classical art and architecture or rely on historical sources dating centuries after the fact to establish the Roman context. Author John North Hopkins allows the material and visual record to play the primary role in telling the story of Rome's origins. Synthesizing important new evidence from recent excavations and detailed analysis of extant buildings and sculpture, Hopkins demonstrates how a series of small-scale projects, from brick to marble, were assembled to create a coherent and spectacular city. The Genesis of Roman Architecture is an essential read for students of Roman history and architecture, art historians, and anyone interested in the origins of the Western world.

June 3rd, 2020 - 35 Bible Verses About Architecture. Genesis 6:14-16: "Make for yourself an Ark of Gopher wood. You shall make the Ark with rooms and shall cover it inside and out with pitch. This is how you shall make it: the length of the Ark three hundred cubits, its breadth fifty cubits, its height thirty cubits."

Roman Architecture Essential Humanities

June 4th, 2020 - Roman Architects overcame these limitations in two ways: one was the dome which can cover a large circular area. The other was the groin vault, a structure formed by the intersection of two tunnel vaults which concentrates the weight at four points and allows the supportive walls to be reduced to four posts. A grid of groin vaults could enclose an unlimited area with a minimum of vertical.
